NOW-ON-SALE IMPERIAL QUARTO, MANGEISH AND CHINESE DICTIONARY. WITH THE PUNTLAND MANDARIN ' - PRONUNCIATION.

An Auglo-Chinese Dictionary, published at Daily Press Office, Hongkong, For comprehensiveness and practical services this Work stands unrivalled. All the new words which the Chinese have of late years been compelled to coin to express the numerous objects in machinery, photography, telegraphy, and in science generally, which the rapid advances HIPMASTERS AND ENGINEERS are of foreign relations has imposed upon them, are respectfully informed that, if upon their here given in extense. Each and every word is Foremon should be at hand, orders for repairs if for students of a most instructive nature. Both the accents being carefully marked on the best-In the event of complaints being found principle hitherto attained. The typography displays the success of an attempt to make the of body, thereby effecting a vast economy of space, achieving a clearness not praviously attained, and dispensing with those vast margins 29 and vacant spaces which have heretofore charac-

terized Chinese publications. To illustrate the vast scope of the work the following facts are submitted for consideration :-Chalmers' Vocabulary contains about 16,000 Chinese characters, and Medburst's English and Chinese Dictionary about 100,000, whilst this work contains more than 50,000 English words, and upwards of 600,000 Chinese characters. Again, despite all the grammars and other elementary works as yet published, the student of this difficult language absolutely requires examples to display the various applications and equivalents of different words which have one general meaning. Of these examples this work contains more than five times as many as any other Dictionary hitheric pub-

For practical purposes the arrangement of the work is so complete, that a reference to its pages enables a person who understands English · C o.'s to communicate effectively with natives who understand nothing but Chinese. In this respect he work will be found indispensable to all Europeans residing in Chins, and to the natives themselves it explains subjects fully with which very few-indeed of them are perfectly acquainted. To parties resident in England and interested
